

REMARKS/ARGUMENT

The Examiner has objected to the drawings under 37 C.F.R. 1.83(a) as not specifically showing each feature of the invention specified in the claims; specifically FIG. 3c as not showing the plurality of spaced charges or array of charges. A revised FIG. 3c in perspective replacing the front view originally filed is filed herewith to show the detonating means 14 as well as the individual charges of the explosive net 2 which comprise the spaced charges. Detonating means 14 are located at the end of the spaced charges as shown which were not visible in the front view. This feature is consistent with other disclosed embodiments in the drawings and no new matter has been added. A replacement sheet for sheet 4/24 is filed herewith.

An amendment to the specification to include the element numbering of the designated explosive net is made herein for consistency.

The Examiner has rejected claims 1, 5 and 9 under 35 U.S.C. §112 as indefinite for lack of complete antecedent agreement in the phrase "the at least one detonating charge". Claim 1 has been amended and is believed to have consistent language for the antecedent in the claim.

Claims 2-4, 6-8, 10 and 16-28 previously withdrawn have been cancelled.

The applicant believes that all claims now pending in the application, as amended, are in condition for allowance and action by the Examiner in that regard is respectfully requested. If additional information is required, please contact the undersigned as counsel of record.

Respectfully submitted,

/Felix L. Fischer/
